

Mallikarjun Reddy

SENIOR GENAI ENGINEER | AI SYSTEMS

📍 Bengaluru, India | 📞 +91 8688715349 | ✉ hello@mallikarjunreddy.com
🌐 mallikarjunreddy.com | 🐙 github.com/infinity-009 | 🔗 linkedin.com/in/infinity09

👤 PROFILE

Senior GenAI engineer with 3+ years building AI products and high-scale backend systems. Experience spans **RAG, text-to-SQL, model evaluation, distributed data pipelines**, and **production cloud services**.

🏢 EXPERIENCE

Senior GenAI Engineer | AI Systems

Jun 2026 – Present

Kredily

— Bengaluru, India

- Built **GenAI and RAG workflows** for HR and payroll intelligence, including natural-language queries and automated reports.
- Improved production performance at roughly **20M requests/day**, reducing evening peak compute demand by about **40%**.
- Delivered **Attendance Regularisation V2** across the company fleet and took the **payroll arrears engine** from design to general availability.
- Improved database read efficiency and month-end reporting; hardened **Celery retries**, leave accrual, and cloud workload reliability.

AI and ML Engineer

Aug 2024 – May 2026

Isourse Technologies

— India

- Built a **conversational BI platform** for exploring SQL data through natural-language questions.
- Developed a **RAG support assistant** with persistent agent memory and evaluated open-source models on reasoning tasks.
- Delivered **Kafka and PySpark pipelines** plus cloud microservices on **GKE and Cloud SQL**.

ML Researcher

Oct 2023 – Aug 2024

Independent / Freelance

- Developed autonomous **Chess-Bot** using custom ML evaluator and optimized **MiniMax algorithm**.
- Engineered hybrid **Air Quality Prediction model** ensemble (LSTM, GRU, Prophet); finetuned 16k-context **Longformer models** using QLoRA.

<> SELECTED PROJECTS

VisualML Video Generator

Gemini, Remotion, FFmpeg, Cloud TTS

Turns a topic into a narrated, multi-scene video. Gemini writes scripts and storyboards; Remotion renders animation, visual checks refine scenes, and FFmpeg assembles the MP4. [\[GitHub ↗\]](#)

Document AI Chatbot

RAG, local LLMs, document retrieval

Lets users ask questions about local documents, retrieving relevant passages before generating an answer while keeping source material on device. [\[GitHub ↗\]](#)

Text-to-SQL Model Fine-Tuning

PEFT, language models, evaluation

Trains and evaluates a language model to translate natural-language questions into SQL, including parameter-efficient fine-tuning experiments. [\[GitHub ↗\]](#)

Image Colorization

Conditional GANs, computer vision

Uses a conditional GAN to infer plausible color from grayscale input, with a training pipeline and visual output examples. [\[GitHub ↗\]](#)

🔧 TECHNICAL SKILLS

AI and ML: LLMs, RAG, prompt engineering, model evaluation, NLP, computer vision, PEFT/LoRA, Text-to-SQL

Systems and Cloud: Python, SQL, Kafka, PySpark, Celery, Redis, GKE, Cloud SQL, Docker, PostgreSQL

Languages & Tools: Python, C++, SQL, Django, FastAPI, React, Git, Linux/Unix, CI/CD, ONNX Runtime

🎓 EDUCATION

B.Tech, Mechanical Engineering

2019 – 2023

Indian Institute of Technology Roorkee

CGPA: 7.4/10 • JEE Advanced Rank: 3015

★ CERTIFICATIONS

Machine Learning Specialization (Coursera/Stanford)

Deep Learning Specialization (DeepLearning.AI)

Web Developer Bootcamp (Udemy)

Competitive Programming (NPTEL)
